PLANT AND SOIL

Contents Volume 218, Nos. 1/2 2000

Salinity increases CO_2 assimilation but reduces growth in field-grown, irrigated rice
F. Asch, M. Dingkuhn and K. Dorffling 1–10

Mineralization of nitrogen from crop residues and N recovery by maize inoculated with vesicular-arbuscular mycorrhizal fungi
T. Paré, E.G. Gregorich and S.D. Nelson 11–20

Chemistry and toughness predict leaf litter decomposition rates over a wide spectrum of functional types and taxa in central Argentina
N. Pérez-Harguindeguy, S. Díaz, J.H.C. Cornelissen, F. Vendramini, M. Cabido and A. Castellanos 21–30

Sensitivity to Cd or Zn of host and symbiont of ectomycorrhizal *Pinus sylvestris* L. (Scots pine) seedlings
J. Hartley-Whitaker, J.W.G. Cairney and A.A. Meharg 31–42

Survival of rhizobia on arrowleaf clover seeds under stresses of seed-coat toxins, heat and desiccation
A.P. Trotman and R.W. Weaver 43–47

Non-destructive measurement of acid phosphatase activity in the rhizosphere using nitrocellulose membranes and image analysis
P.F. Grierson and N.B. Comerford 49–57

Leaf development, transpiration and ion uptake and distribution in sugarcane cultivars grown under salinity
Z. Plaut, F.C. Meinzer and E. Federman 59–69

Nitrogen cycling associated with the decomposition of sunflower stalks and wheat straw in a Vertisol
M. Corbeels, G. Hofman and O. Van Cleemput 71–82

Respiration from C_3 plant green manure added to a C_4 plant carbon dominated soil
G. Nyberg, A. Ekblad, R.J. Buresh and P. Högberg 83–89

Growth and nitrogen mineralization of selected fungi and fungal-feeding nematodes on sand amended with organic matter
J. Chen and H. Ferris, 91–101

Cereal/legume rotation effects on cereal growth in Sudano-Sahelian West Africa: soil mineral nitrogen, mycorrhizae and nematodes
M. Bagayoko, A. Buerkert, G. Lung, A. Bationo and V. Römheld 103–116

Soil nitrogen turnover in proximal and distal stem areas of European beech trees
S.-C. Chang and E. Matzner 117–125

A phytogeochemical survey of the flora of ultramafic and adjacent normal soils in North Morocco
M. Ater, C. Lefèbvre, W. Gruber and P. Meerts 127–135

The effect of agricultural practices on the development of indigenous arbuscular mycorrhizal fungi. I. Field studies in an Indonesian ultisol
C.L. Boddington and J.C. Dodd 137–144

The effect of agricultural practices on the development of indigenous arbuscular mycorrhizal fungi. II. Studies in experimental microcosms
C.L. Boddington and J.C. Dodd **145–157**

The importance of root gravitropism for inter-root competition and phosphorus acquisition efficiency: results from a geometric simulation model
Z. Ge, G. Rubio and J.P. Lynch **159–171**

Influence of arbuscular mycorrhizal fungi on soil structure and aggregate stability of a vertisol
B.N. Bearden and L. Petersen **173–183**

Sample preparation and scanning protocol for computerised analysis of root length and diameter
T.J. Bouma, K.L. Nielsen and B. Koutstaal **185–196**

Changes in root morphology of white lupin (*Lupinus albus* L.) and its adaptation to soils with heterogeneous alkaline/acid profiles
S.J. Kerley **197–205**

Resource-island soils and the survival of the giant cactus, cardon, of Baja California Sur
Á. Carrillo-Garcia, Y. Bashan and G.J. Bethlenfalvay **207–214**

Biomass yield and nitrogen fixation of legumes monocropped and intercropped with rye and rotation effects on a subsequent maize crop
M. Karpenstein-Machan and R. Stuelpnagel **215–232**

Manganese dynamics in the rhizosphere and Mn uptake by different crops evaluated by a mechanistic model
U.S. Sadana and N. Claassen **233–238**

Effect of nitrogen supply rate on disease resistance in tomato depends on the pathogen
E. Hoffland, M.J. Jeger and M.L. van Beusichem **239–247**

Uptake of P from apatite by *Pinus sylvestris* seedlings colonised by different ectomycorrhizal fungi
H. Wallander **249–256**

The fate of nitrogen from winter-frozen rapeseed leaves: mineralization, fluxes to the environment and uptake by rapeseed crop in spring
J.-F. Dejoux, S. Recous, J.-M. Meynard, I. Trinsoutrot and P. Leterme **257–272**

Repeated beneficial effects of rice inoculation with a strain of *Burkholderia vietnamiensis* on early and late yield components in low fertility sulphate acid soils of Vietnam
V. Trân Van, O. Berge, S. Ngô Kê, J. Balandreau and T. Heulin, **273–284**

Author index **285**

Instructions for authors **287–292**
